

**Chemola™ Delta VGTA-09** is a Valve Lubrication Adapter Kit.

### Recommended Uses

Used to perform routine or emergency valve maintenance on pipeline valves in the field or at pipeline compressor stations. This valve lubrication adapter kit makes maintenance easier and more cost effective. It resolves:

- Leaking valve lube sealant fittings
- Relieving fitting pressure
- Painted, damaged or plugged fittings
- Fitting conversions to giant buttonheads
- Needing adapters

*A complete line of valve lube sealant fittings and accessories is available upon request.*
