

Chemola™ Desco TFE Dry-Pak

Synthetic Packing for Valve Stems, Rods and Shafts

Chemola™ Desco TFE Dry-Pak is a TFE-fluorocarbon packing of selected particles sizes for maximum bridging. It can be used as a packing material for valves and miscellaneous applications. This 100% TFE-fluorocarbon packing has low friction and non-adhesive qualities.

Recommended Uses

Chemola™ Desco TFE Dry-Pak is a permanent packing which can be supplemented and does not need to be replaced. It is resistant to most chemicals across the entire pH range.

Typical Characteristics

| | |
|-------------------|----------------------------------|
| Appearance | White coarse flakes |
| Solids Content | PTFE |
| Density (lb/gal) | 7 (bulk) |
| Temperature Range | up to 450°F (232°C) - no minimum |

Packaging Information

| Item Number | Unit Size |
|-------------|------------|
| 0250010BP | 10 lb pail |

DO NOT USE ON OXYGEN SERVICE.
Special packaging sizing available upon request.
